Summary

Picking up messy, unstructured data and transforming it into strategic decisions that help deliver positive business outcomes is what I do best. In simple words, I am a seasoned ML engineer with a knack for using cutting-edge tech to tackle tough problems. My expertise lies in Machine Learning, Computer Vision, NLP, and Multimodal Learning.

Hello, my name is Zayan Rashid Rana and I am a second year student of BS Computer and Information Sciences at Pakistan Institute of Engineering and Applied Sciences (PIEAS).

As a student, I have learned the importance of working collaboratively with others, listening to their problems, and helping them find solutions. I have worked on various projects independently and as a team member, gaining experience in project management, communication, and problem-solving skills.

In addition to my academic pursuits, I have worked part-time as a Content Writer.

My passion for technology and my desire to learn and grow in the ML industry has motivated me to pursue a career in this field. I am currently seeking opportunities to gain practical experience and apply my knowledge in a professional setting.

If you're looking for a motivated and talented Deep Learning professional with strong technical skills and excellent teamwork abilities, please feel free to reach out to me. I am excited to contribute my skills and knowledge to any organization that shares my passion for technology.
